

Personalia

Name	Pieter Bogaert
Birthday	July 22 nd , 1980
Nationality	Belgian
Telephone	+32 473 548377
E-mail	pieterbogaert@gmail.com

Summary of Skills and Qualifications

I am a biomedical scientist by training and professional experience, holding a PhD in Biotechnology. My academic specialization in molecular immunology and flow cytometry has been a linchpin to build a diversified professional experience in biomedical research, laboratory diagnostics and IVD manufacturing.

Prior to my current function, I have been department head in an accredited Belgian medical laboratory, as well as department head in a global laboratory CRO for clinical trials. In these functions, I acquired profound experience with international standards for laboratory diagnostics (CLSI) and quality management systems (QMS) for medical laboratories. Trained as internal EN ISO 15189 auditor, I co-ensured continuous adherence of other departments to this aforementioned standard. As department head, I was end responsible for the verification, implementation and harmonization of various clinical assays in medical laboratories on multiple continents, in line with the analytical and quality requirements of laboratory tests for clinical trials. These clinical assays ranged from routine certified IVD assays (e.g., hematology, serology, clinical chemistry...) to laboratory-developed specialty tests (e.g. flow cytometry, electrophoresis, immuno-assays...).

My accumulated expertise in medical laboratory IVD devices (reagents and instruments) led me to my current function, wherein I work with IVD device manufacturers to ensure device compliance with Regulation (EU) 2017/46. This includes consultancy and gap assessment on regulatory compliance and performance evaluation strategy, as well as writing and reviewing of device technical documentation. I am currently managing a team of device compliance specialists, but I have previously authored and compiled technical documentation for over 50 devices, including the first Class C IVD device certified under Regulation (EU) 2017/46. As such, I am well-acquainted with various (EN) ISO / IEC standards relevant for IVD devices (QMS, risk management, labelling, performance evaluation...), interaction with different stakeholders (regulatory affairs, quality, R&D...) within IVD manufacturing companies, IVD technical documentation requirements, and document submissions to Notified Bodies.

Throughout my different professional functions, I have always worked in direct communication with my company's customers. My communication and collaboration skills were key elements in these roles, as well as my ability to follow up and steer projects at multiple locations to make sure timelines are met and, if needed, issues are escalated properly. I have experience in managing and motivating people, either as a direct people manager or as a technical specialist to support specific projects, via a positive attitude and clear communication. I am used to and enjoy working in culturally diversified teams using multiple languages.

Experience breakdown by IVDR codes

- Authoring or reviewing technical documentation, compliant with Regulation (EU) 2017/46
 - IVR 0301, 0503, 0602, 0701, 0702
 - IVS 1001, 1004, 1007, 1008
 - IVT 2005
 - IVP 3006, 3007
 - IVD 4005, 4008
- Other experience (medical laboratory or academic training)
 - IVR 0301, 0506, 0601, 0602, 0608

- IVS 1008
- IVT 2005
- IVP 3006, 3007, 3014
- IVD 4002, 4005, 4008

Self-evaluation

- Self-confident and enthusiastic person that likes to work with and for people
- Result-driven motivator that strives for improvement and welcomes organizational changes
- Good communicator and customer-oriented team player
- Works independently but benefits greatly from the team's input and advice
- Decision maker and long-term planner that sets objectives in the context of a bigger picture

Work Experience

Nov. 2019 – Now	<u>Medical Device Compliance Senior Consultant</u> , QARAD (part of QbD Group)
Jan. 2018 – Oct. 2019	<u>Head of Science Department</u> , Cerba Research (previously BARC Central Lab)
Mar. 2017 – Dec. 2017	<u>Scientific Liaison – Flow Cytometry</u> , Cerba Research (previously BARC Central Lab)
Sept. 2015 – Feb. 2017	<u>Customer Service Manager</u> , CRI Medical Lab (Cerba Research)
June 2014 – Aug. 2015	<u>Head of Flow Cytometry</u> , CRI Medical Lab & Cerba Research (previously BARC Central Lab)
Sept. 2012 – May 2014	<u>Operational lead – Flow cytometry technical support team</u> , BD Biosciences Europe
Jan. 2010 – Aug. 2012	<u>Flow cytometry specialist – Departmental Core Facility</u> , VIB Inflammation Research Centre & Ghent University
Apr. 2008 – Dec. 2009	<u>Post-doctoral researcher – Unit Molecular Signaling and Cell Death</u> , VIB Inflammation Research Centre & Ghent University

Education

2002 – 2008	<u>Doctor in Sciences: Biotechnology</u> . PhD thesis: ' <i>Molecular characterisation of macrophage activation and functions in mouse models of bronchial inflammation</i> '. Ghent University, Lab for Molecular Immunology. Promoter: Prof. Dr. Johan Grooten
2000 – 2002	<u>Master in Biotechnology</u> , Ghent University, finished with distinction. Master thesis: ' <i>Time- and level-controlled expression of anti-oxidant enzymes through a retroviral tetracycline system in tumor cell lines</i> '. Ghent University, VIB Inflammation Research Centre – Unit Molecular Immunology. Promoter: Prof. Dr. Johan Grooten
1998 – 2000	<u>Bachelor in Biology</u> , Ghent University, finished with distinction

Languages

- Dutch : native proficiency
- English : full professional proficiency
- French : professional working proficiency

Authorship on international, peer-reviewed scientific papers

De Koker S, Van Hoecke L, De Beuckelaer A, Roose K, Deswarte K, Willart MA, Bogaert P, Naessens T, De Geest BG, Saelens X, Lambrecht BN, and Grooten J. *Inflammatory monocytes regulate Th1 oriented immunity to CpG adjuvanted protein vaccines through production of IL-12*. *Sci Rep.* 2017 Jul 20;7(1):5986

Andries V, Vandepoele K, Staes K, Berx G, Bogaert P, Van Isterdael G, Ginneberge D, Parthoens E, Vandenbussche J, Gevaert K, van Roy F. *NBPF1, a tumor suppressor candidate in neuroblastoma, exerts growth inhibitory effects by inducing a G1 cell cycle arrest*. *BMC Cancer.* 2015 May 10;15(1):391.
